Professional Services
Migrations and Upgrades

Perforce Software's version control platform, Helix Core, sets the standard for organizations of any size, helping you track and manage changes to all digital assets for world-class development at scale.

Our expert consultants can help you get even more from your investment in Helix Core and maximize your ROI by:

- Speeding your time to value by optimizing your configuration.
- Enhancing your productivity.
- Ensuring successful deployments, migrations, and integrations with optimized outcomes.
- Delivering peace of mind knowing an experienced team is supporting you every step of the way.

Whatever the scope of your project, turn to our team of professionals experienced in migrations and upgrades.

Software Configuration Management (SCM) System Migrations

Migrations are an area where the value of consulting experience is particularly compelling. We've done it all, and that means we'll get you migrated quickly and smoothly from a wide variety of legacy SCM systems — with an approach that aligns with your requirements.

Legacy SCM migration projects commonly include:

- Standard Starter Pack.
- Exploring migration strategy options, which vary per your legacy system.
- Historical data migration (using detailed history import tools or baseline and branch import techniques).
- Retooling build and release process automation.

- Porting systems integrations with defect trackers, workflow management systems, etc.
- Helping end users evaluate desktop tooling impact, such as IDE integrations.
- Project planning and management support.

Server Upgrades

Upgrading Helix Core is a straightforward and painless process, but some upgrades introduce new metadata tables that require additional time. For a seamless upgrade experience and minimal downtime for users, engage our consultants to review:

- Any existing custom tools and integrations that may need testing or further investigation.
- New features that address issues with existing requirements or topologies.

Get Started Today

No one knows version control like Perforce. Our Services team is here for you and has the expertise to ensure your success with migrations and upgrades.

Get in touch and we'll be happy to review the specifics of your project or consulting needs.
