Modern Distributed Development

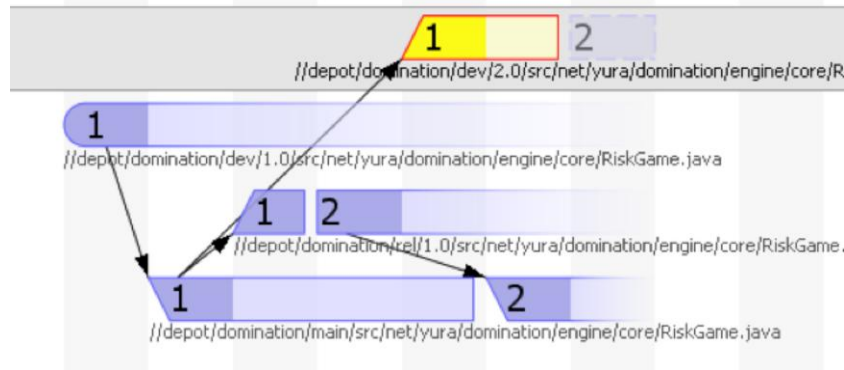

The News

Perforce Git Fusion is the first solution
to meet the needs of both
Git developers and the **enterprise...**
without compromise on either side.

Git Fusion Offers Git Developers

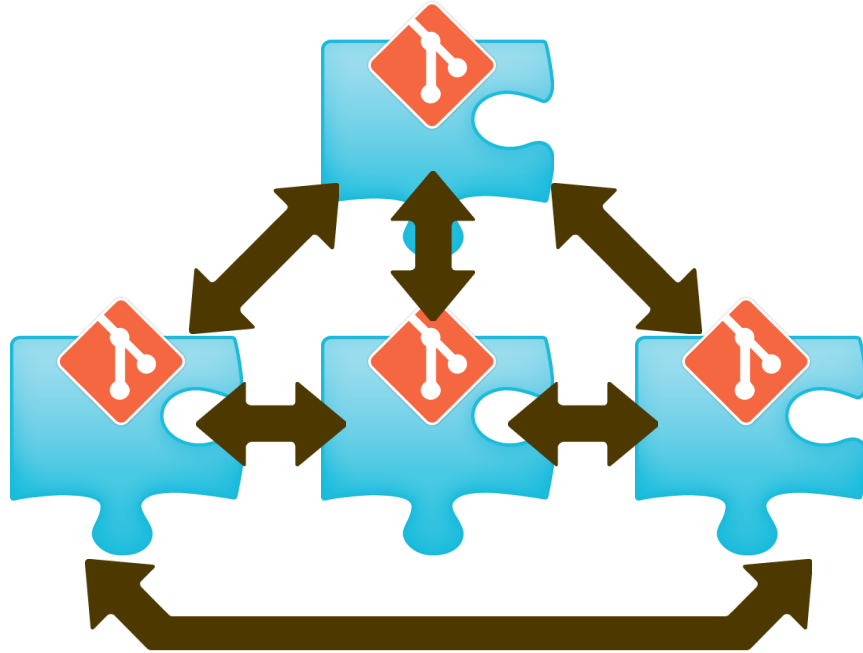

- Same Git experience they're used to
- New capabilities for code reuse and improved collaboration
- Advanced Perforce tools, when they want them
 - Revision Graph
 - Time Lapse View
 - P4 Merge
 - P4Admin

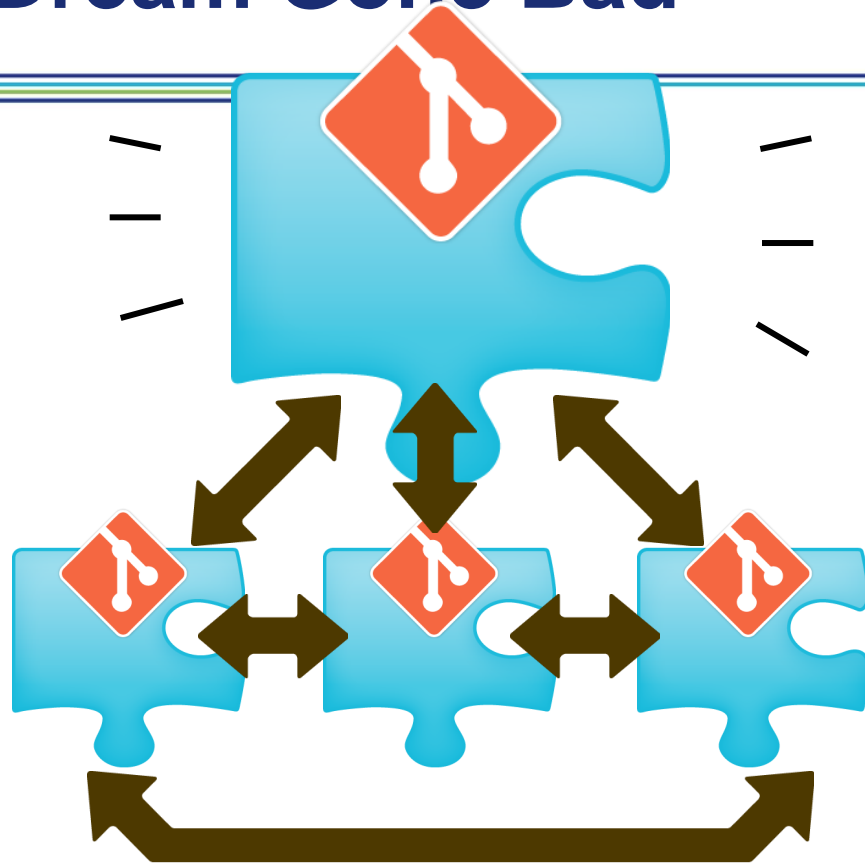

Git Fusion Offers the Enterprise

- Ability to stick with tried-and-true release engineering processes
- IP security and defensibility
- Assurance of development quality and compliance, with all assets stored in Perforce
- Brings scalability to Git
 - Thousands of users
 - Millions of files
 - Hundreds of terabytes of data
- Oversight of formerly silo'ed Git repos

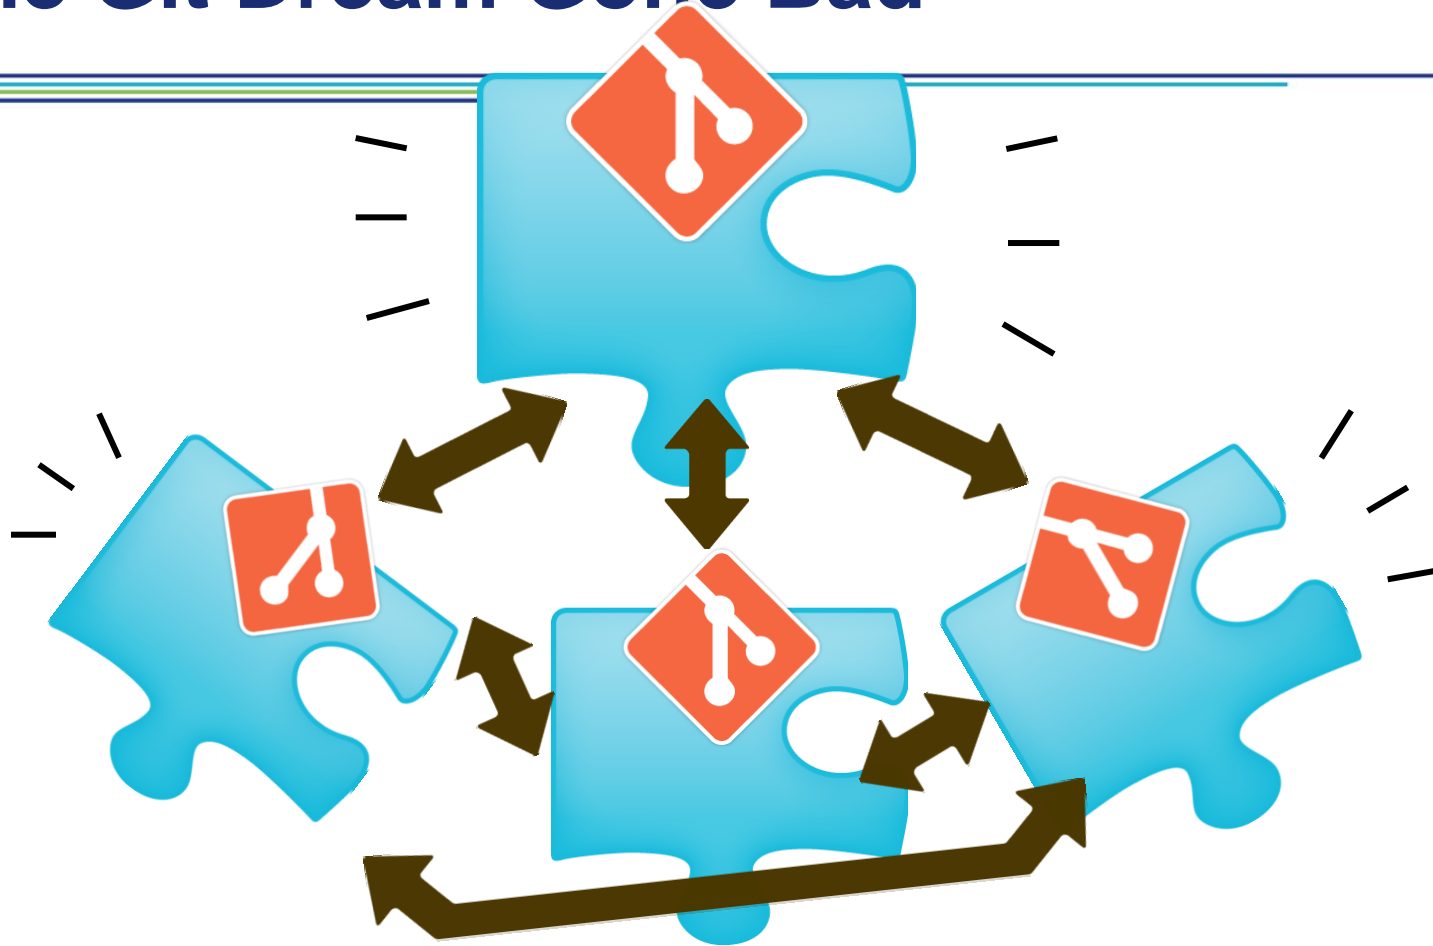

The Git Developer Dream
